TRICK

TRICK

Empower
Circular Economy
With Blockchain
Data Traceability

TRICK project will provide affordable and standardised enabler to move SMEs closer to circular economy.

About

TRICK project supports the adoption, tracing and demonstration of sustainable approaches by means of an innovative and circular product information management system, based on a data collection platform secured by Blockchain and integrated with an open marketplace for the matched services.

Goals

Circular economy roadmap

Data collection

Standardised commercial services

Open marketplace

42
Months

29
Partners

11
Countries

2
Pilots
