ICS fase 1: Transmission of ENS for vehicles arriving in Greece as office of first entry into the EU

In view of the temporary unavailability of the Greek ICS system, the traders, registered to Italian EDI system, can send the ENS, relating to means of transport which have a Greek office of first entry into the EU, at the customs office of **Rivalta Scrivia (code IT069103)**. This code must be entered in the field Prog. 5 Position 41 "**Code Section customs office where the operation takes place**" of the head record and in field Prog. 64 Rif. Field S11 "**Reference number of first entry customs office of the ENS**".

In the field Prog 66.1 "**Reference number of subsequent entry customs office**" it is necessary to indicate, as the office of the second entry, the Greek office of real first entry.

The AIDA system will forward the necessary information to the Greek ICS system.
