

Extraction on 01.07.2013

This mid-year file includes all changes made in the goods codes during the 1st semester of 2013, except those entering into force on 01 Jan 2013, that are part of the 2012-2013 correlation table.

File contents:

- tab "new codes" :

1st column: new goods codes starting between 02 Jan 2013 and 01 July 2013.

Column "Entry into force": the start date of the new codes.

Column "derived from": the codes from which the new codes originate;

- tab "old codes":

1st column: goods codes closed between 01 Jan 2013 and 30 June 2013 and, if any, codes left open but partially replaced by new codes (i.e. by codes starting between 02 Jan 2013 and 01 July 2013).

Column "absorbed by": the new codes that (partially) replace the codes from the 1st column.

An "old code" is partially replaced if it is still open (Column "end" is empty). If the old code is closed (column "end" contains a date), this means that the old code is completely replaced.
